

Comprehensive Systems: Curriculum, Instruction and Educator Support

Charter School Development Center 2025

Meet Today's Facilitators

Kristen Manchester

Curr. Coordinator

An experienced educator and leader passionate about ensuring all students have both access and opportunity to learning. Dedicated to supporting educators in data-driven instruction, collaborative processes and reflective strategies that support all learners.

Montoya Mayo

Professional Learning

A passionate educator grounded in the “warm demander” philosophy, recognized for cultivating engagement among both students and adult learners through inclusive, dynamic learning environments.

Kaylee Long

Curr. Coordinator

A dedicated educator experienced in data analysis, teacher coaching, system implementation, and collaboration to pilot and engage in strategies to benefit all students and community members.

Victoria Loria

PLI Manager

An experienced leader and compassionate educator who believes in access and learning innovation. Dedicated to developing systems and spaces that drive student growth, family connection, staff success and community strength.

Dina Zakaria

Professional Learning

A dedicated educator with a passion for creating meaningful learning environments that bridge content with real world context for all learners. Driven to empower our educators to give all students equal access.

Professional Learning

The Professional Learning & Innovation (PLI) Department partners with educators and leaders across Visions In Education to strengthen learning, instruction, and leadership through professional learning, coaching, consultation, and curricular review. Our professional learning team designs and facilitates engaging learning experiences and provides differentiated coaching to support instructional excellence. Our curriculum department conducts rigorous curriculum analysis to ensure access to a guaranteed and viable curriculum aligned to California standards. Through collaboration, data-informed decision-making, and a commitment to equity, we equip all staff with the tools, strategies, and resources needed to improve student achievement and support individualized learning pathways in Visions' unique learning environments.

Agenda & Outcomes

- I. Comprehensive Systems of Support for **Curriculum & Instruction** with Victoria Soria
 - A. Establishing Context
 - B. Initiatives & Projects
 - C. Identifying a Problem of Practice
- II. The What, Why and How of **Professional Learning** with Montoya Mayo
 - A. Tangible Tool: Instructional Best Practices Research
- III. The What, Why and How of **Coaching & Consultation** with Dina Zakaria
 - A. Tangible Tool: Agenda with the 4 key questions in a Professional Learning Community
- IV. The What, Why and How of **New Curricular Review** with Kaylee Song
 - A. Tangible Tool: Curriculum Review Rubric
- V. The What, Why and How of **Current Curricular Review** with Kristen Manchester
 - A. Tangible Tool: Course Review Tool
- VI. The What, Why and How of **Comprehensive Systems of Support** with Victoria Soria
 - A. Peer Consultation in Problem of Practice

Outcomes

- I. Identify your own problem of practice in system sustainability
- II. Understanding the What, Why and How of comprehensive systems of support for educators
- III. Identify your own bite-sized next step as a way to respond to the needs of your charter school in an ever changing world

Better

Online Middle School

Our Online Middle School program completed its first full year and has **officially transitioned from a pilot program to a full academy!**

1%
Better

Credit Recovery

Our Credit Recovery program completed its first full year, helping **hundreds of high school students catch up and graduate.**

1%
Better

TK Events & Field Trips

Transitional Kindergarten (TK) students enjoyed **more focused events, workshops, and field trips** this year as part of a statewide TK effort.

1%
Better

Seal of Biliteracy

For the first time, **Visions offered the State Seal of Biliteracy exam to early graduates.** As a result, **63 graduates received their Seals of Biliteracy (including 7 students earning multiple seals!)**

1%
Better

Dual Enrollment Increased!

More high school students than ever are taking community college classes and this year, **287 students took more than 450 courses!**

PLI 2025-2026 Initiatives & Projects

PLI Initiative: High levels of professional learning for instructional staff organization-wide with a focus on PLC implementation, instructional best practices, and guaranteed and viable curriculum through the California standards and frameworks.

- **Initiative: Professional Learning**
 - Provide differentiated professional learning opportunities on curriculum and instruction with a focus on PLC practices, Instructional Best Practices (IBPs) and the utilization of standards and frameworks for a guaranteed and viable curriculum.
- **Initiative: Coaching & Consultation**
 - Provide differentiated coaching opportunities for educators and consultation for instructional leaders within Visions' unique learning environments on curriculum and instruction with a focus on CSTPs, PLC implementation, Instructional Best Practices (IBPs) and the utilization of standards and frameworks for a guaranteed and viable curriculum.
- **Initiative: Curricular Review**
 - Provide in-depth analysis and recommendations for curricular resources based on the California standards and frameworks for a guaranteed and viable curriculum with equitable access to all Visions within our unique learning environments.

Educator Essentials

Professional Learning	Coaching & Consultation	Curricular Review
Professional Learning at VIE	Instructional Coaching & Consultation	Curriculum Review at VIE
Professional Learning & Innovation Dept.	Professional Learning & Innovation Dept.	Professional Learning & Innovation Dept.
Professional Learning Community (PLC)	Instructional Best Practice (IBP)	Guaranteed & Viable Curriculum (GVC)

Professional Learning Community (PLC) (hours): A collaborative group of educators engaged in ongoing cycles of collective inquiry, action research, and data-driven reflection to continuously improve teaching practices and ensure high levels of learning for all students.
Example: The educators at Visions meet as a professional learning community to analyze student data and refine their instructional strategies.
"You cannot go to a PLC, you are a PLC"

Instructional Best Practices (hours): Evidence-based teaching strategies and methods, grounded in research and professional standards, that effectively promote student learning, engagement, and achievement by providing clear structure, high expectations, active participation, and meaningful real-world connections.
Example: The educator used instructional best practices such as active learning and scaffolding to increase student engagement and improve achievement.

Guaranteed and Viable Curriculum (GVC) (hours): A school defined set of essential knowledge and standards that all students are assured access to ("guaranteed") and that can be realistically taught to

Instructional Best Practices

WHAT:

Research impactful instructional best practices that work within Visions' unique learning environments and provide meaningful staff training on how to best leverage these instructional best practices to support positive student outcomes.

WHY:

Equip our educators with instructional strategies and tools that are research based to produce impactful outcomes on student learning experiences.

HOW:

Researcher/Facilitator:

- Research IBP for specific learning environment
- Identify and design training resources
- Embed in coaching program and professional learning opportunities

Participants:

- Synchronous learning opportunities such as workshops, webinars, and institutes
- Asynchronous learning opportunities such as Canvas courses, self-paced workshops, and resource libraries
- Coaching and consultation upon request to meet the unique needs of groups or individuals

Coaching & Consultation PLC Practices

Coaching & Consultation

The Coaching Continuum at Visions

The Consultation Continuum at Visions

Coaching Program Development

The Coaching Development Plan focused on building the capacity of instructional coaches to deliver impactful support across Visions. Coaches engage in continuous professional learning to refine their skills in:

- **Modeling and co-teaching strategies**
- **Data analysis and reflective dialogue**
- **PLC practices, IBPs and GVCs**

The plan emphasized the following:

- Regular training sessions and collaborative learning among coaches
- Alignment of coaching practices with org. goals and priorities
- Use of evidence-based tools and protocols
- Development of strong relationships and trust with educators

Through this plan, coaches are equipped to provide individualized, team-based, and system-wide support, fostering a culture of continuous improvement and ensuring high-quality instruction that drives student success.

Coaching Cycles

- The **purpose** of the coaching cycle is to **build educator capacity** through implementation of **effective instructional practices** in order to boost **student achievement**.
- The coaching cycle is embedded within all layers of the coaching continuum.
- The cycle consists of a series of **coaching conversations** engaging the educator in identifying a goal, learning the practice, and improving through reflection/data. This is a cyclical process and can begin at any point in the cycle.

Professional Learning Community Practices

PLC Practices: The Four Key Questions

Four Key Questions

1. **What** do we expect students to learn?
2. **How do we know** they are learning it?
3. **How do we respond** when they **do not** learn?
4. **How do we respond** when they have **already** learned?

1. **Essential standards** refine **what** we expect students to learn.
2. **Common formative assessments** measure **how** we know students are learning the essential standards.
- 3/4. **Aligning curricular resources**, engaging in **data analysis** and incorporating **instructional best practices** underscore our **why** to support the learning and academic progress of all students in our unique learning environments.

The Four Key Questions

WHAT:

1. What do we want students to learn and know/do?
2. How do we know they are learning it?
3. How do we respond when they do not learn?
4. How do we respond if they have already learned?

WHY:

To provide guidance for collaborative teams to a focus on learning, and establish collective responsibility for student learning.

HOW:

Focus on Learning - Build a Collaborative Culture - Results Orientation

Curriculum Evaluation Tool

Essential Features Rubric

WHAT:

The Essential Features Rubric is a reference tool for evaluating the quality and usability of curriculum. The rubric accompanies the Curriculum Evaluation Tool and focuses on two key areas: Content & User Experience and Equity & Access.

WHY:

The rubric allows for data-informed decision making about curriculum by identifying strengths and gaps in both new and existing curriculum and gives us a common language to engage in collaborative discussions with ed partners about the curriculum.

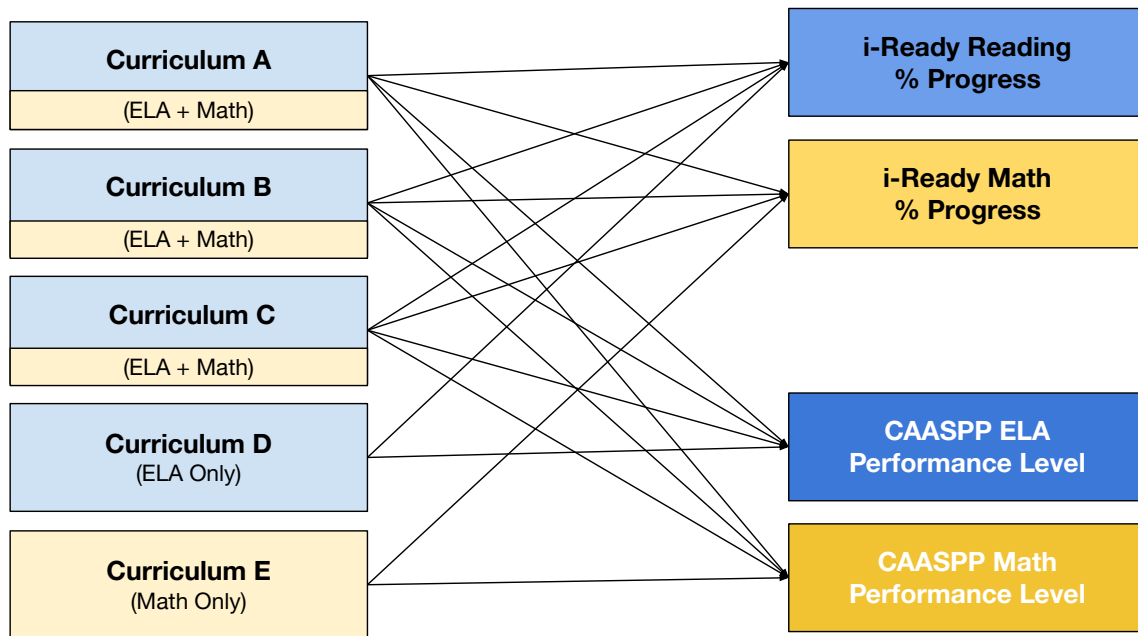

The Essential Features Rubric helps confirm that Visions students have access to a guaranteed and viable curriculum that is rigorous, accessible, and engaging.

HOW:

A small thumbnail image of the Essential Features Rubric table. The table has multiple columns and rows, with a blue header. The text is too small to read, but it appears to be a detailed rubric with various criteria and ratings.

Visions engages in a systematic review process that begins with examining curriculum and using the Essential Features Rubric to rate each feature using the descriptors. We analyze those ratings to identify strengths and gaps in a curriculum. The information is used to inform curriculum adoption decisions, professional development needs, and curriculum improvements.

Curricular Review Impact Data TK-8

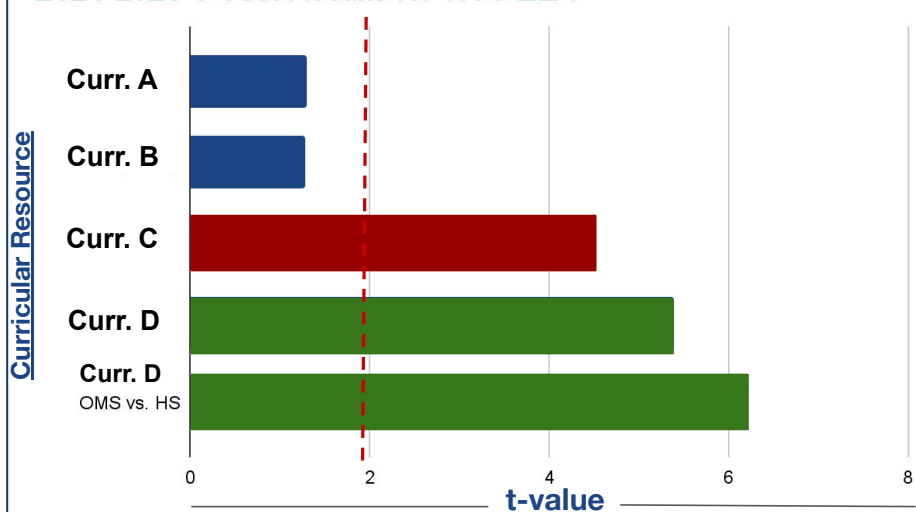

How were curriculum impacts measured?

Analyses were conducted to understand the relationship between K-8 student curriculum use, performance on i-Ready Diagnostics and performance on CAASPP ELA and Math summative assessments. i-Ready growth was calculated using a one tailed T-Test along with effect-size, while CAASPP summative performance was measured by distribution by curriculum type.

Current Curricular Review Course Evaluation

What is Curricular Review?

1. Review for alignment to CA standards and essential standards.

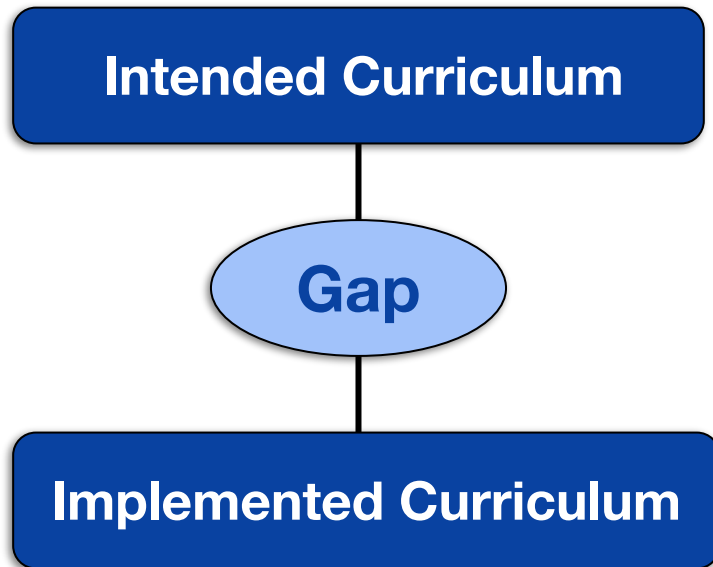

4. Ensure all students have access to a guaranteed and viable curriculum.

2. Evaluate the level of rigor, equity, and accessibility.

3. Collaborate with instructional leaders to identify gaps and strengths.

Clear and Well-defined Processes

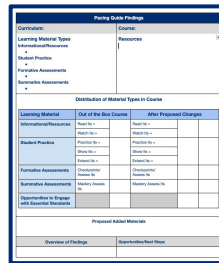

This screenshot shows a complex table with multiple columns, including course titles, standards, and various data points. It appears to be a comprehensive guide for pacing instruction across different subjects.

VIE Pacing Guide

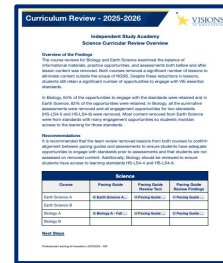

This screenshot displays a table used for correlating course standards. It has columns for course standards and corresponding content areas, facilitating the mapping of curriculum to standards.

Course Standards
Correlation Tool

This screenshot shows a form-like table for recording findings. It includes sections for 'Learning Material', 'Distribution of Material Types in Course', and 'Proposed Action Items', with checkboxes for 'Before' and 'After' states.

Course Review
Findings Tool

This screenshot displays a summary table with columns for 'Course', 'Pacing Review', 'Pacing Review', and 'Pacing Review'. It provides a high-level overview of findings across different courses.

Summary of
Content Findings

This screenshot shows a control sheet with columns for 'Pacing Guide', 'Pacing Guide', 'Pacing Guide', and 'Pacing Guide'. It includes a 'Status' column with color-coded indicators (green, yellow, red) to track the progress of various review items.

Course Review Tool

WHAT:

The Course Review tool is a structured tool used to evaluate how well a course is aligned to the state standards and whether it provides students with multiple opportunities to fully engage in the learning cycle - from instruction and practice to feedback and assessment.

WHY:

The tool allows for data-informed decision making about our current curriculum by identifying strengths and gaps in the curriculum and gives us information to engage in data-informed collaborative discussions with ed partners about the curriculum.

The Course Review Tool helps confirm that Visions students have access to a guaranteed and viable curriculum that is rigorous, accessible, and aligned to the state standards.

HOW:

Visions engages in a systematic in-depth review of each course that analyzes standards alignment, student learning opportunities, and both formative and summative assessment opportunities. The data is compiled and used to identify strengths and gaps in the curriculum as well as opportunities for development. The findings guide collaborative discussions with education partners around curriculum refinement, professional development planning, and next steps to strengthen teaching and learning.

Analysis Overview to identify common themes and trends in a content area

Staying Focused Shows Strong, Positive Outcomes

K–12 Overall: Students using a **consistent curricula** all year **outperformed** peers across all programs.

★ **Home School K–8:** Higher i-Ready growth in ELA & Math; grades 3–8 **exceeded** peers on CAASPP.

★ **Online Middle School:** **Even greater** ELA & Math gains, often at higher rates.

★ **Independent Study 9–12:** **Stronger** growth on NWEA MAP vs. prior years; first year with content supported by administrator-led PLCs.

Problem of Practice

- Problem of Practice
 - State - Identify - Evaluate - Design - Collaborate - Establish
- Change Readiness Tool
 - Explore individual and organizational readiness
- Comprehensive Systems of Support Guiding Questions
 - Readiness with each other and within systems

1. State the problem
2. Identify the needs
3. Evaluate Change Readiness
4. **Design Success Criteria**
5. **Collaborate**
6. **Establish a Cycle of Inquiry**

Comprehensive Systems of Support

WHAT:

A **comprehensive system of support** is a multi-tiered, interdependent framework designed to align **policy, leadership, professional learning, coaching, and curriculum** to build and sustain **competencies across all levels** of a school system, **from students to policymakers**. These supports are grounded in **PLC implementation, instructional best practices, and guaranteed and viable curricula (GVC)** aligned to **California Standards and Frameworks**.

WHY:

The **purpose** of building **comprehensive systems** of support is to:

- **Ensure instructional equity** and consistent access to a guaranteed and viable curriculum for all students.
- **Develop and sustain educator effectiveness** at all career stages through aligned professional learning and coaching.
- **Build leadership capacity** among administrators to drive instructional improvement.
- **Embed PLCs** and Instructional Best Practices (IBPs) as core drivers of continuous improvement.
- **Support coherent implementation** of California's standards and frameworks across diverse and unique learning environments.
- **Strengthen alignment across organizational levels**, so that each group (leaders, teachers, students) is reinforced by the supports above and around them.

HOW:

Comprehensive systems of support are implemented through **aligned actions** across all levels of the **school system**. At the **policy level**, leaders establish **structures, resources, and partnerships** to reinforce **PLC practices, Instructional Best Practices (IBPs)**, and a **Guaranteed and Viable Curriculum (GVC)** aligned to **California Standards**. **Administrators and instructional leaders** build **capacity** through targeted **professional learning, coaching, and curricular guidance** to lead **instructional improvement**. **Educators** engage in **differentiated professional learning** and **coaching** to refine practice, collaborate in **PLCs**, and implement **standards-aligned instruction**. **Students** benefit from **high-quality, consistent learning experiences** that promote **equity** and **academic success** within Visions' **unique learning environments**.

Reflective Process

When **groups**, rather than individuals, are seen as the main units for **implementing** curriculum, instruction, and assessment, they **facilitate** development of **shared purpose** for student learning and **collective responsibility** to achieve it.

(Newmann & Wehlage, 1995, p. 38).
